

# Dell PowerProtect Data Domain Virtual Edition (DDVE) on Equinix Metal®

Protect your data with ease and flexibility.

As more enterprises adopt a multicloud strategy, leveraging a common data protection solution across their on-premises public/private cloud infrastructure becomes increasingly difficult. PowerProtect DDVE on Equinix Metal delivers an optimal approach for data protection with all the benefits of Data Domain combined with the automation, interconnection and scalability of Equinix Metal.

## Data protection for hybrid multicloud

Leveraging Equinix Metal hardware availability across 18 worldwide locations and Equinix Fabric™ interconnections across 65 markets, customers can build data protection strategies with ease and flexibility using PowerProtect DDVE. PowerProtect DDVE on Equinix Metal effectively extends benefits like deduplication, scalability and flexibility to a broad range of workloads including databases, virtualized environments and data in the public cloud. Gain back leverage over your data and deploy best practices in multicloud data protection.

## High-performance hardware at software speed

Dell Technologies and Equinix Metal have collaborated to deliver a high-performance appliance based on Dell PowerEdge technology. PowerProtect DDVE on Equinix Metal performs exceptionally better than instances based on public cloud technology, providing faster restore times that are critical to business uptime.

## About Dell Technologies

Dell Technologies (NYSE:DELL) helps organizations and individuals build their digital future and transform how they work, live and play. The company provides customers with the industry's broadest and most innovative technology and services portfolio for the data era.
