

Tailor your VMware experience on Equinix Metal

Meeting today's data demands requires distributed applications with stringent controls.

VMware Cloud Foundation on Equinix Metal

For mission critical & latency-sensitive applications

Cloud economics

- As-a-service efficiency
- Predictable costs
- Fully managed

Local cloud performance

- 30+ metro locations
- < 15 ms latency
- Assured response times

Trusted cloud control

- VMware Cloud Foundation
- Data residency
- Security consistency

VCF on Equinix Metal delivers a lower total cost of ownership compared to on-premises deployments based on internal TCO analysis.

32%

Improved ROI

29%

TCO reduction

52%

Reduction in Co² emissions

Customer use cases

Manage mission critical data

The cloud operating model is designed for traditional enterprise applications and balances cost, performance and control needs.

Performance for edge workloads

Our system supports latency-sensitive applications and data-intensive workloads while reducing the footprint of replicated sites.

Data residency mandates

We comply with government and industry regulations to ensure data remains within specific countries, states or municipalities, and with approved cloud providers.

Multi-Cloud application flexibility

Our local cloud solution offers accessibility to the cloud native services of any hyperscaler, ensuring flexible multicloud applications.

VCF on Equinix Metal—Lower costs local cloud performance and trusted cloud control.
