

# Pricing Guide

VMware Cloud Foundation (VCF) on Equinix Metal is a cloud-like SDDC solution with the control, performance, and security of physical hardware, plus the benefits of VMware’s comprehensive software platform. Customers pay for the Equinix Metal workload optimized hardware starting at 1-year terms.

## Includes:

- VCF certification
- Hardware support of the solution, like a reserved gen3 or workload optimized instance.
- Operation and maintenance of the server(s).
- 24/7 support by Equinix for hosting and networking
- Ability to add [Equinix operated NFS External Storage-as-a-Service](#) from Pure Storage, NetApp, and Dell Technologies.

## Does not include:

- VMware Cloud Foundation licenses
  - Transfer existing VCF software subscriptions to Equinix Metal with Broadcom’s support.
  - Purchase new or additional VCF licenses direct from Broadcom or other authorized resellers.
- Support for Broadcom software-specific issues
